A History of the Ship...

After the Revolutionary War, new United States economy depended upon seaborne commerce with other nations. Mer-

chants who traded in the Mediterranean found it increasingly difficult to conduct trade. American merchant sips, left vulnerable by the disbanding of the Continental Navy in 1785, were attacked by Barbary (North African) corsairs who captured the ships and enslaved American sailors.

Recognizing the threat to our economy and the lives of American citizens, President George Washington argued for a Navy. Congress responded on March 27, 1794 with the Naval Armament Act, authorizing six frigates to be built along the eastern seaboard.

Constitution was designed by Joshua Humphreys and Josiah Fox to be powerful enough to defeat any enemy within her class and fast enough to out sail a stronger opponent.

Built at Edmund Hartt's shipyard in Boston, the wood for her construction came from Maine to Georgia. *Constitution,* the largest ship to be built in Boston up to that time, was launched October 21, 1797.

-The Barbary War-

For centuries, the Barbary States of Morocco, Algiers, Tunis, and Tripoli had levied tribute on even the most powerful European nations. If payment was refused, ships were captured and the crews sold into slavery. Before building our Navy, America paid hundreds of thousnads of dollars in presents and tribute to Algeria, Tripoli, and Tunis. The Bashaw of Tripoli, however, enraged that other nations were receiving more tribute than he, cut down the flagpole at the American consulate on May 14, 1801, thus declaring war on the United States.

Constitution was Commodore Edward Preble's flagship in the Mediterranean in 1803. Upon arrival, American forces blockaded Tripoli Harbor and bombarded fortifications and armed Tripolitan boats.

On June 3, 1805, a peace treaty was drawn up in *Constitution's* cabin. Trubute to Tripoli ceased and the American captives were released.

In 1812, Great Britain had been 19 years at war with France. The Royal Navy reigned supreme and needed ever increasing number of sailors. American merchant ships were seized to prevent trade with France and American crews were "impressed" into British service. Rallying to "Free Trade and Sailor's Rights" America declared war on Great Britain, June

18, 1812.

The Ship at a Glance...

War of 1812 Era

Armament

Rated 44 Guns, she carried:

(24) 32-Pounder Carronades

Crew: 4-8 / Range: ~400 yards

(30) 24-Pounder Long Guns

Crew: 7-14 / Range: ~1200 yards

(1) 18-Pounder Bow Chasers

Speed: 13+ Knots (~15mph)

Sail Area: 42.710 Square Ft.

Crew Composition

450-500. Including:

55 Marines / 8-10 Ship's Boys

30-40 Officers & Midshipmen

USS Constitution Today

Foremast Height: 190' 11"

Mainmast Height: 210"

Mizzenmast Height: 175' 4"

Displacement: 1,900+ tons

Length: 207' (Billethead to Taffrail)

Crew Composition:

70 Active Duty U.S Navy Sailors

3 Officers, 4 Chiefs, 63 Crew

Ship's Stats

On August 19, southeast of the Gulf of St. Lawrence, a ship was sighted and *Constitution* made for her with all sails set. It proved to be HMS *Guerriere*, the British 38-gun frigate infamous for terrorizing American ships. When *Constitution* was still far astern, *Guerriere* began firing. *Constitution* bore down upon the enemy in silence. The gun crews stood patiently at their quarters awaiting the order to fire. Cannon shot from *Guerriere's* smaller 18-pound guns contin-

ued to impact but did remarkably little damage to *Constitution's* solid oak hull and an unknown Sailor shouted, "Huzzah! Her sides are made of iron!" Thus *Constitution* gained the renowned title of "Old Ironsides."

The inspired crew was ready to take the fight to *Guerriere*, but not until the ships were nearly abreast did Captain Isaac Hull give the word, "Now, boys, pour into her!" A whole broadside struck *Guerriere* and for 15 minutes the ships exchanged fire before her aft mast fell. *Constitution* passed ahead and sent a raking broadside

crashing down the entire length of the enemy's decks, which cut away much of the rigging.

Guerriere's fore and main masts fell, and, left a helpless wreck, Captain James Dacres surrrendered his ship. The British

lost 78 killed and wounded while the Americans suffered only seven dead and seven wounded in a battle that lasted approximately 35 minutes, one of the shortest in history.

It was a dramatic victory for America and for *Constitution*. In half an hour, the United States "rose to the rank of a first-class power" and the country was fired with fresh confidence and courage in the unpopular War of 1812.

On February 20, 1815, Constitution had her last great fight.

In 1830, it was rumored that *Constitution* was to be condemned and scrapped. A poem by Oliver Wendell Holmes, Sr., entitled "Old Ironsides", aroused popular feeling amongst Bostonians; eventually Congress appropriated money for restoration in 1833.

Between 1835 and 1855, *Constitution* made numerous voyages, including her 1844-46 cruise around the world under Captain John Percival, when she covered 52,370 miles in more than 500 days at sea. From 1853 to 1855, "Old Ironsides" patrolled the west

coast of Africa searching for illegal slave traders.

Two British warships the frigate HMS *Cyane* and the sloop-of-war HMS *Levant* were spotted off the island of Madeira. Although indi-

vidually each was smaller and lighter than Constitution, together,

their combined batteries were heavier. Captain Charles Stewart's

very skillful maneuvering prevented them from regrouping and

overpowering him. Nearly five hours later, Cvane and Levant had

-In Transition-

During the American Civil War, "Old Ironsides" was used as a U.S. Naval Academy training ship. In 1878 she went on her last trip across the Atlantic, carrying American exhibits to the Universal

Exposition at Paris, before returning to service in the Apprentice Training Squadron for newly enlisted men. Her long career at sea closed in December, 1881 when she was decommisioned, stripped of her rigging, and, in 1882 converted to a Navy receiving ship - used for administrative purposes - in Portsmouth Navy Yard, Kittery, Maine.

Visiting Us...

surrendered.

USS *Constitution* is open for public visitation year-round and can be found via internet mapping sites at

Charlestown Navy Yard 1 Constitution Rd. Charlestown, MA, 02129

For directions, visitor hours, and more, visit our website at

http://history.navy.mil/ussconstitution

All visitors to the ship are required to go through a security screening process to ensure the safety of the ship, its guests and crew.

-Into the 20th Century -

In 1897, John "Honey Fitz" Fitzgerald, a Massachusetts Congressman and grandfather of future president John F. Kennedy, drew public attention to "Old Ironsides," by spearheading action to bring *Constitution* back to Boston, for her centenary.

From 1927-31, "Old Ironsides" underwent a major restoration. Funds for the restoration were generously donated by the people of America, with some of it raised in a "pennies campaign" by school children across the

nation. The remaining balance necessary was appropriated by Congress.

From 1931 - 1934, *Constitution* toured the East, Gulf and West coasts, transiting the Panama Canal, as thanks to America. The voyage began in Boston on July 2 and covered more than 22,000 miles and 76 ports. "Old Ironsides" returned to the Boston Navy Yard on May 7, 1934, after having hosted more than 4.6 million visitors.

On July 21, 1997, in celebration of the ship's 200th year, *Constitution* sailed for the first time in more than 116 years, thrilling millions of patriotic Americans and proving once again that she is truly America's Ship of State. The ship carries out her modern day mission as the Navy's ambassador to the public and is a representative of the thousands of Sailors and Marines that serve the United States proudly.
